## How BIG are Cells?

Read page nine in the Diversity of Life resources and answer the following questions using complete sentences.

1. Are most cells larger or smaller than a human hair?
2. What is a micron? Is a micron larger or smaller than an inch?
3. Why are we not able to see some bacteria with the microscopes in our room? (Include numbers in your answer.)
4. Write three facts about human cells.
5. Why do cells have to be small?
